

# Sebastian Gómez

QA Engineer sebasdgg3001@gmail.com • Venezuela, Caracas • [LinkedIn](#) • [My portfolio](#)

QA Engineer at the intersection of product, engineering, and users. I build automated tests that catch real issues, integrate monitoring before problems reach customers, and translate user complaints into preventive coverage. My goal: teams that ship with confidence, not stress.

## EXPERIENCE

---

**QA Engineer** United States | 11/2025 – Present

### USA Today

- Validated telemetry/tracking using URL parameters, cookies, and QSP checks for key user journeys.
- Manual cross-browser testing in staging across national and local-market sites.
- Added coverage to existing Postman API collections and Cypress UI test suites.

**QA Engineer** Venezuela | 04/2025 – Present

### 3MIT

- Tested finance-heavy Odoo ERP modules to ensure compliance with national tax regulations.
- Built and maintained a broad regression suite for accounting workflows and critical user flows.
- Improved QA efficiency by standardizing test strategy and integrating automation into CI/CD.

**QA Engineer** United States | 07/2025 – 08/2025

### SalmonLabs (Contract)

- Built repeatable lead data pipelines (API/scraping → parsing → QC → delivery) and tracked SLAs.
- Integrated ChatGPT API to review script outputs, introduced automated review step that eliminated manual bottleneck.
- Processed large CSV/XLSX datasets: cleaning, deduplication, normalization, and reconciliation.

**QA Engineer** Panama | 08/2024 – 04/2025

### Netforemost

- Built a reusable Selenium test framework for critical flows and integrated it into CI/CD.
- Led API testing in Postman to catch issues earlier and reduce recurring bugs.
- Applied TDD practices to improve maintainability and reduce recurring bugs.

**Manual QA** Spain | 01/2024 – 08/2024

### Uemura

- Created QA process from scratch: test strategy, documentation, and core test coverage.
- Improved releases by aligning QA with product/design and validating key CMS/database flows.

## SKILLS & TOOLS

---

**Testing Frameworks:** Cypress, Selenium, Playwright, Postman

**Languages & Tools:** Python, JavaScript, SQL, Git, CI/CD (GitHub Actions), Jira, n8n

**Specialties:** API Testing, Data Validation, Test Automation, TDD, Telemetry/Tracking QA

## CERTIFICATIONS

CS50 & CS50P: **Professional Certificate in Python** | Harvard University

**Professional Working Proficiency in English** (CEBA Program, VIII Levels)

Software **Testing Masterclass** (Udemy)

## EDUCATION

Instituto Universitario de Nuevas Profesiones

**Associate Degree in Computer Science**

Venezuela • 2023 – 2026

## LANGUAGES

**Spanish** – Native

**English** – Professional Working Proficiency
